No More Guesswork...The Future In Whole Health Diagnostics Has Arrived!

When our health is not in good condition, our body will automatically give out certain alarms such as becoming easily fatigued, body aches, headaches, insomnia, lack of appetite, depression, anxiety, stress, fear, bad temper, palpitations, dizziness, inertia and so on. People who have these symptoms are said to be in a sub-health condition. The World Health Organization estimates that 10% of adults worldwide belong to this group.

Is sub-health detectable? The answer is yes.

No longer will there be a need for ultrasonic, nuclear magnetic resonance or radiography in helping clients target their health conditions.

The Quantum Analyzer Will Produce Your Client's Health Status In Minutes

We are introducing the newest high-tech innovation that combines the best of medicine, bio-information, electrical engineering and other sciences. Applying quantum medicine as the theoretical basis, this advanced electronic equipment gathers the weak magnetic field of human cells for scientific analysis. With this information, the Quantum Magnetic Analyzer is able to determine a person's health status and suggest standard prevention recommendations for the main problems.

Invented in China by a team of medical and computer experts, the Quantum Magnetic Analyzer was developed based on the study of several million clinical cases over a period of many years. The accuracy rate of the analyzer device can reach up to 85%.

By holding the sensor in the palm of the hand, health data is obtained from the body within minutes. This is absolutely not science fiction; it is the epoch-making high-tech quantum magnetic analyzer.

What is Your Client's Health Status ... Right Now?

Is their digestive system processing food properly?

Is the liver doing its' job?

Are the kidneys in optimum condition?

What is the condition of the cardiovascular system?

Are multi-vitamins effective and being absorbed?

Are vitamin D levels normal?

Are they drinking enough water?

Is there adequate blood flow to the brain?

What If...

All of these questions concerning your client's health could be answered accurately, reviewed by you and presented to them.

What If...

The testing was accomplished without any blood being drawn or without submitting the body to any radiation?

What If...

All of this could be accomplished in about a half hour and for a nominal fee?

Does this seem like something you would expect to have available in the future?

What if... The future was now?

The Quantum Magnetic Analyzer will your help clients take control of their own health by producing 16, easy-to-understand reports reflecting various conditions of their body's health systems.

Non-Invasive And Painless... The analysis will tell you the condition of your client's health without blood analysis or radiography... **No Radiation - No Blood Drawn... 22 - 23 (24) Health Reports Produced In Just 2 Minutes:**

Basic physical quality analysis

Blood sugar analysis

Bone disease analysis

Bone mineral density analysis

Rheumatoid bone disease

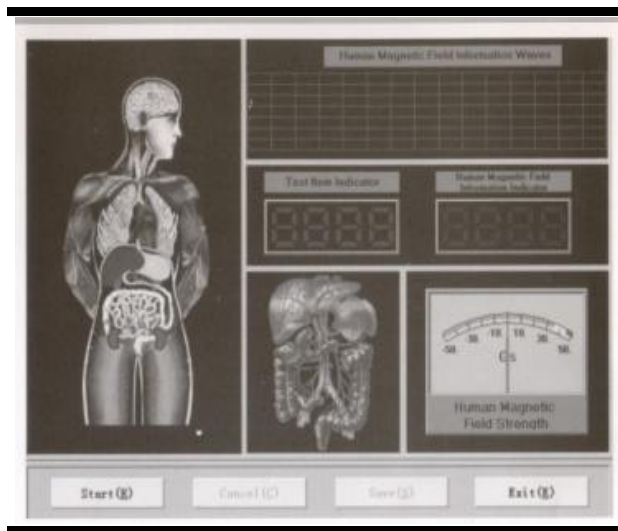

Brain nerve analysis

Human toxin analysis

Pancreatic function analysis

Skin health analysis

Gynaecology analysis for women

Cardiovascular & cerebrovascular analysis

Gastrointestinal function analysis

Gall bladder function analysis

Kidney function analysis

Lung function analysis

Liver function analysis

Trace elements analysis

(Ca+, Fe, Se, Pb, Zn, Vitamins etc)

Prostate analysis and sexual function

No Waiting For Test Results...

Whatever conventional testing method is used, blood analysis or radiography - it can take one, two or as long as three weeks to get results. This can create depression and additional anxiety in anticipating the unknown. The hi-tech Quantum Magnetic Analyzer scans the body and will produce health reports in just 2 minutes. All of the reports will be reviewed, compiled and can be presented to your client at the time of the testing.

The Science Behind The Analyzer

The human body is an aggregate of numerous cells which continuously grow develop, split, regenerate and die. By splitting up, cells renew themselves. For adults, about 25 million cells are splitting up every second and blood cells are constantly renewing at a rate of about 100 million per minute. In the process of cellular split-up and renewal, the charged bodies of nucleus and extra-nuclear electrons as the basis unit of a cell, are moving and changing ceaselessly at a high speed as well as emitting electromagnetic waves without interruption. The signals of electromagnetic waves emitted by human bodies represent the specific condition of the human body and therefore, different signals of electromagnetic waves will be emitted by the conditions of good health, sub-health, disease etc. The health condition can be analyzed if such specific electromagnetic wave signals can be analyzed.

The **Quantum Magnetic Analyzer** is a new instrument created to analyze such phenomenon. The weak magnetic frequency and energy of the human body is collected by holding the sensor, and after amplification by the instrument and treatment by the built-in microprocessor, the data is compared with the standard quantum resonant spectrum of diseases, nutrition and other indicators incorporated in the instrument to judge whether the sample waveforms are irregular using the Fourier approach. Analysis and judgment can thus be made on health conditions and the main problems of the tested person based on the result of the waveform analysis, as well as standard protective and curative suggestions.

This method of analysis is a rapid, accurate and non-invasive testing method and particularly suitable for comparing the curative effects of medicine and health products and for checking sub-health conditions. There are more than 30 main analysis items, including cardiovascular and cerebrovascular conditions, bone mineral density, trace elements, blood lead, rheumatism, lung and respiratory tract, nephropathy, blood sugar, stomach and intestines, liver and gall, cranial nerves, gynaecology, prostate, bone disease, the trace elements of selenium, iron, zinc and calcium, etc.

With only 10 or so cells of pathological change, the analyzer can capture the changes of cells and predict the precursor of disease. By taking health-care actions at this moment, you may be enabled to effectively prevent various chronic diseases.

Multiple indicators of your health can be obtained within minutes. This analysis method is designed to save you time and energy. The database of the analysis system has been established with scientific methods, strict health statistic treatment and demonstrations of a large number of clinical cases, thus leading to a high analysis accuracy.

A Diagnostic Support Tool You Cannot Afford To Be Without

While you would expect to pay thousands of dollars for a device of this nature, we are able to offer this extraordinary diagnostic analyzer for a very reasonable cost.

Imagine the costs your clients would have to incur with conventional private diagnostic testing (blood tests, CT scans or MRIs). In addition, many of the findings produced by the analyzer cannot be detected by conventional testing.

Using the analyzer will help you detect health changes before obvious symptoms and signs of disease appear. Early detection will make for early treatment.

The Quantum Magnetic Analyzer is an ideal diagnostic tool for medical offices, chiropractors, nutritionists, energy workers, health consultants, and more.

Includes software (PC compatible with Windows 7 32-bit, Windows Vista)

(English Language Version Only)

Can You Really Afford To Be Without This?

Features of the Quantum Magnetic Analyzer

- **Accurate**

The statistical analysis of health is carried out rigorously by using scientific methods and it is approved by a large number of clinical practices. The accuracy rate of this healthcare product is claimed to be up to 85%.

- **Ahead**

The therapy device can detect health changes before obvious symptoms and signs of disease appear. Early detection can make for early treatment.

- **Simple**

The operation of this health equipment is quite easy. Users can master the detecting techniques after a short-term period.

- **Convenient** Health checks can be made anytime and anywhere.

- **Security**

The health check is made in a non-invasive way, so the instrument will not harm the human body. An encryption lock can be removed when the device is not being used, therefore protecting the client's information.

Information Regarding The Testing - The health check is made in a non-invasive way, without blood being drawn and without any radiation being emitted. The testing device will not harm the human body. The analyzer measures the magnetic fields in your body to obtain the results, therefore wearers of pacemakers or those with metal surgical replacements may not be suitable for testing. The test is also not effective for pregnant or nursing women.
